

MWN Combustion Safety Supervisor Panel

Marshall W. Nelson and Associates
Milwaukee Wisconsin // Eagan Minnesota
v14

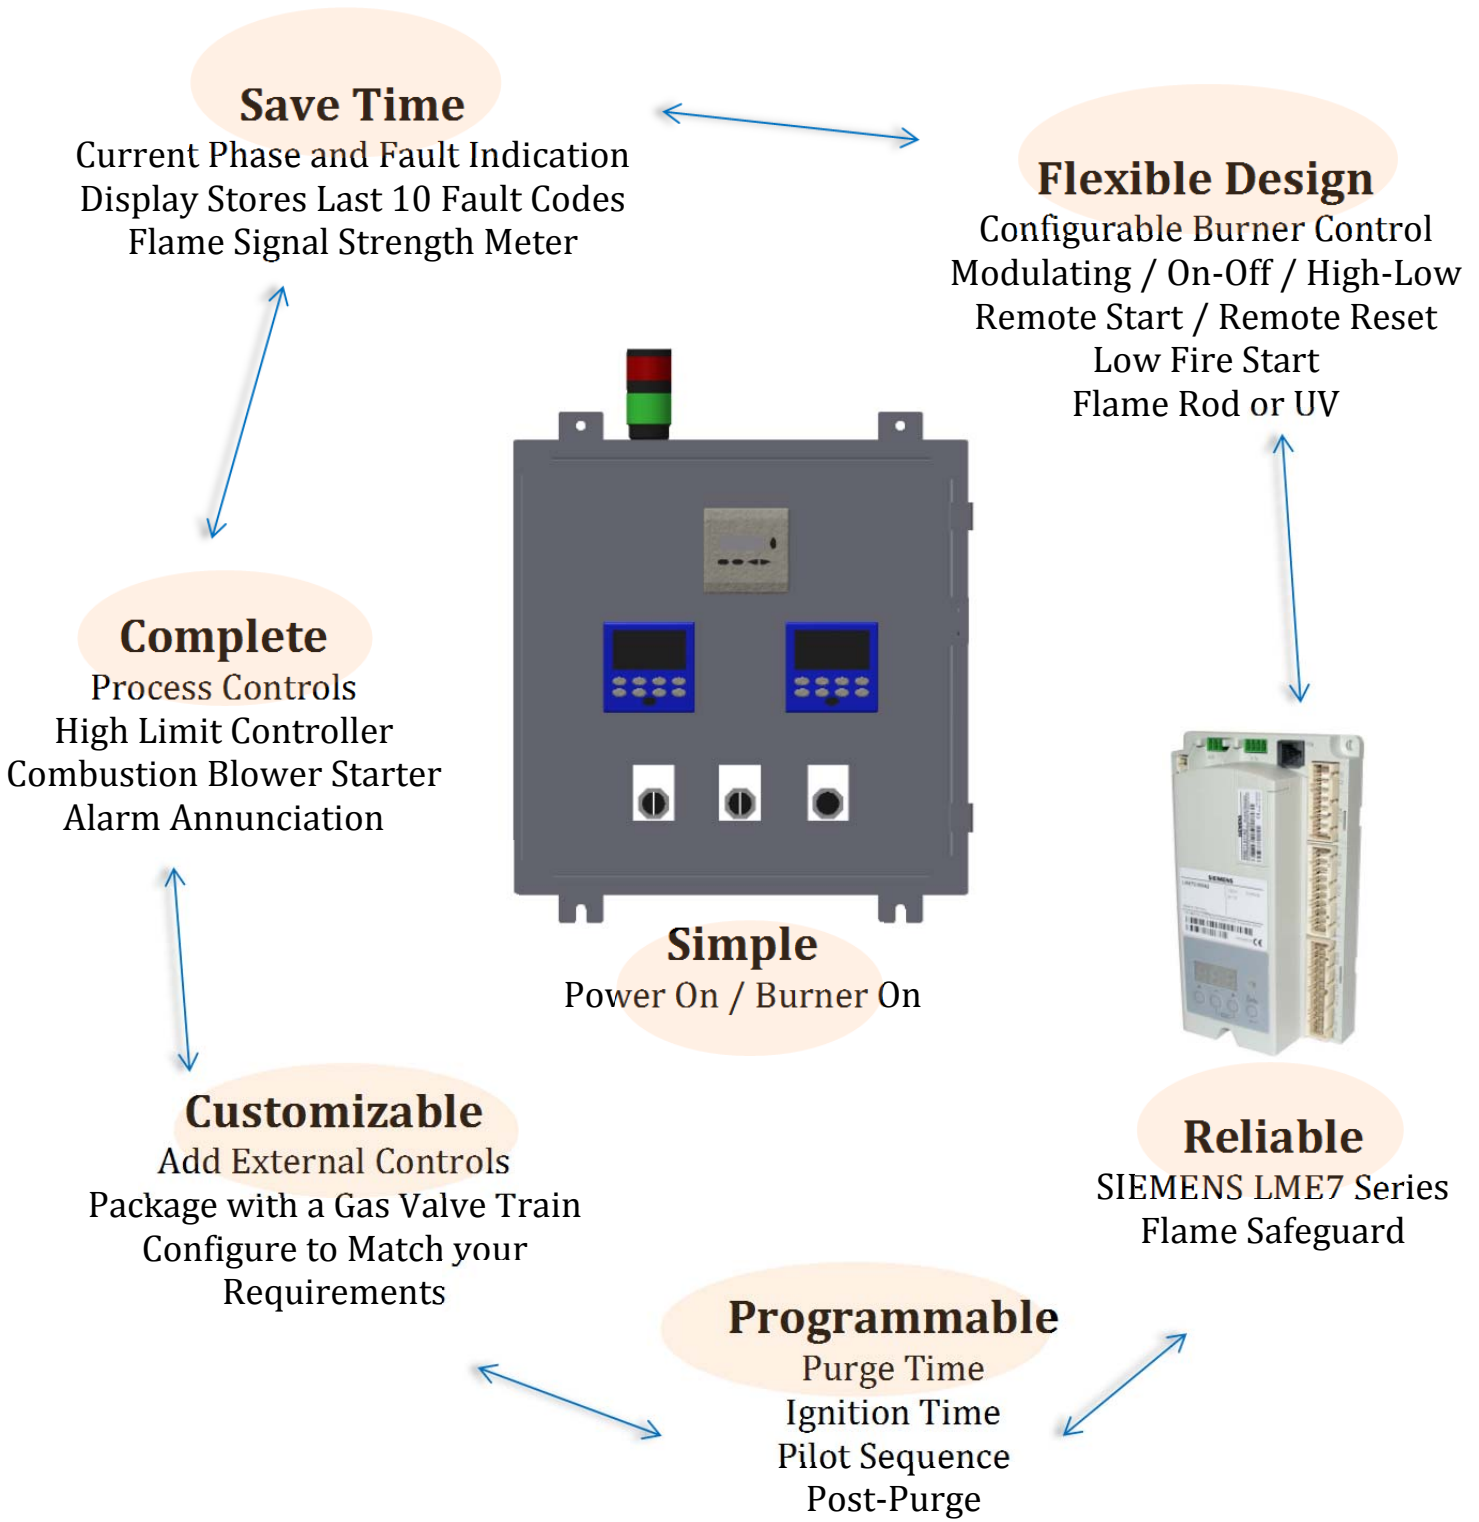

The Fire Marshall is a set of configurable flame safety control panels featuring the Siemens LME7 Flame Safeguard. Select from three Levels with a range of options that make customization simple.

- **Level 1** is for applications where there are existing or remote mounted temperature controls and just a Flame Safeguard is needed.
- **Level 2** provides options for full temperature control in applications with up to 1/2hp –single phase combustion blowers. Level 2 can be used in conjunction with external 3 phase motor starters for larger applications.
- **Level 3** uses 480v/3 phase incoming power for application with combustion blowers up to 5hp. Level 3 provides options for full temperature control.

All Panels are UL certified!
Custom controls and modifications are available!
